

Cirqlback — Business Guide (Pro Plan)

Business — Pro plan · User Manual

For: growing and multi-location local businesses on the **Pro (\$49.99/mo)** plan. Log in at: </auth> · Your dashboard: </merchant>

This is your complete how-to for running your business on Pro — everything in Core, plus the tools for multiple locations and scale, in the order you'll use them. New to Cirqlback? This guide stands on its own. On the smaller **Core (\$19.99/mo)** plan? See the [Core Guide](#).

Quick start — your first live reward in ~15 minutes

1. **Create your account** at </auth> → sign up as a **Business**.
2. **Fill in your business profile** (name, address, hours) — this also puts your pin on the Discovery Map.
3. **Create a campaign** — e.g. a "Buy 5, get 1 free" loyalty card (\$2).
4. **Set up a Cirql tag** and link it to that campaign (\$3).
5. **Place the tag** on your counter and **tap it with your phone** to test.
6. Repeat for each location, then watch taps land in **Analytics** (\$8).

1. Set up your business & locations

1. Go to </auth> → **Create an account** → sign up as a **Business**, then open your **Business Hub** at </merchant> .
2. Open **Settings** (</settings>) and complete your **business profile** — name, category, description, **address** (your map pin), hours, phone, email, logo.
3. **Add your other locations** — Pro covers **up to 3**. Give each its own profile so each gets its own map pin, tags, and hosted page.

Your profile feeds both your **map pin** and your **hosted business page** (\$4). Fill it in thoroughly, per location.

Your plan at a glance (Pro):

	PRO
Business locations	Up to 3
Campaigns	Unlimited
Customer taps / month	Unlimited
Cirql tags included	50
Analytics	Tap & redemption, across locations
Hosted business page	Included
Support	Priority

2. Create your rewards (campaigns)

A **campaign** is the rule behind a reward. From the Business Hub, click **Create Campaign** to open the guided **Campaign Builder** (Type → Details → Review → Complete).

The Campaign Builder walks you through picking a reward type, then the details.

Pick a type:

- **Discount Offer** — money off a purchase (e.g. "10% off," "\$5 off orders \$25+").
- **Loyalty Points** — reward return visits. Set a **tap goal** (e.g. 5) to make it a **punch card**: the reward unlocks every Nth tap.
- **Referral Bonus** — reward customers for bringing friends.

Then give it a **name** and **reward** (e.g. "Free coffee"), set a value if relevant, optionally require **GPS proximity**, and finish. Your campaign is **live** immediately and ready to attach to a tag.

Campaigns are private to you — only your business can edit or delete its own campaigns.

With **unlimited taps** on Pro, you can run campaigns as aggressively as you like — no monthly tap ceiling to watch.

3. Set up your Cirql tags

A **Cirql tag** is an NFC sticker or stand at your counter that customers tap to earn. From the Business Hub, click **Program Tag** to open the **Cirql Tag Setup** wizard.

The Cirql Tag Setup wizard programs your tags in five guided steps.

1. **Label the tag** (e.g. "Front counter," "Patio") so your analytics show which spots perform best.
2. **Link it to a campaign** you created.
3. **Write it to a physical NFC tag**. Programming is done on an **NFC-capable Android phone** — hold the blank tag to the back of the phone when prompted. On a device without NFC, use the **Smart NFC Writer** option or the printable **QR code** as a backup.
4. **Place the tag** where customers naturally pause, and **tap it with your own phone** to confirm it works.

You can **rename**, **re-point**, or **deactivate** your own tags anytime, and each tag tracks its own tap count.

Pro includes **50 Cirql tags** — enough to cover several locations and multiple spots in each.

4. Your hosted business page (included)

Give customers a polished one-page website — your brand, hours, specials, and your **live Cirql rewards** — hosted at cirqlback.com/biz/your-business. No web skills needed, and on **Pro it's included free** (no add-on to buy).

Step 1 — It's already on. The **Hosted business page** editor is right on your Business Hub, unlocked — nothing to purchase. (Run more than one location? Each has its own page.)

Step 2 — Make it yours. The **Hosted business page** editor appears on your Business Hub. Customize with simple controls — no layout can break:

- **Brand color** (pick any color or a swatch) and a **font** style
- A **hero** style and optional cover **image**
- **About** and **Specials** text
- Turn sections **on/off and reorder** them (About, Specials, Live Cirql Rewards, Hours, Gallery, Contact, Social)
- **Hours, contact, social links**, and a **photo gallery**

A **live preview** updates as you type.

About

Artisan coffee & daily tap rewards

Hours

Mon 09:00 – 17:00

Save first, then publish to make changes live.

The editor: fill in the form on the left, watch the live preview on the right.

Step 3 — Publish. Click **Save**, then **Save & publish**. You'll get your public link ([/biz/your-business](#)) and a view counter. Your active campaigns appear automatically in the **Live Cirql Rewards** section — publish once and they stay current.

Powered by [Cirqlback](#)

Your published page — brand color, about, hours, and contact, all from your profile and editor.

Share your [/biz/...](#) link on Google, Instagram, and printed materials. To take it down, open the editor and click **Unpublish**.

5. Run the daily loyalty loop

Once tags are live, the loop runs itself:

- Customers **tap** → **earn** automatically — nothing to do per tap.
- When a customer completes a punch card or earns a discount, they show a **reward code**.
- **Redeem it:** look the code up in your dashboard and mark it redeemed. A redeemed code can't be reused.

Anti-abuse is built in: a per-tag cool-down, optional GPS proximity, and device fingerprinting stop rapid repeat taps, so the punch card can't be gamed.

6. Grow across locations: multi-store group campaigns

Pro shines when your locations work together. From your Business Hub's **group-campaigns** panel you can run **multi-store campaigns** — a single "tap at all 3 locations" trail, or a shared rewards program across your stores.

- **Create** a group campaign spanning your locations (or **join** open ones with neighbor businesses).
 - Customers progress by tapping at **different** stores, which drives cross-location visits.
 - Track **per-location participation and completions** in one place.
-

7. Contests & scavenger hunts (Builder add-on)

Want richer, gamified campaigns? The **Contest & Scavenger-Hunt Builder** add-on (\$14.99/mo) lets you build **multi-stop scavenger hunts** and **prize contests** across your stores.

1. From the **Add-ons** panel, enable **Contest & Scavenger-Hunt Builder**.
2. Open the builder, name your hunt, set the **required stops** and the **prize**.
3. Pick which of your locations are stops, and publish.

Great for grand openings, seasonal events, and neighborhood crawls.

8. Analytics at scale

Open **Analytics** (</analytics>) for real figures from taps and redemptions — and with Pro, **compare across your locations**:

- **Taps, active customers, rewards issued vs redeemed** (conversion) — per location and combined
- **Busiest hours** and **peak windows** by store
- **Top campaigns** and **top tag locations**
- A **recent-activity** feed across your portfolio

Enter sales data per location to unlock accurate revenue, average-order, and Cirql-driven-sales metrics.

Want best-tag-zone, return-visit-timing, and heatmap insight? Add the **Advanced Analytics Pack** (\$12.99/mo).

9. Keep customers coming back

- **Favorites & reminders:** customers can favorite your shop. From the **Reminders** panel, send them a nudge or offer ("Your card's almost full!"). It shows in their in-app feed.
 - **Your tap screen:** by default it shows your business name and offer. Want your **colors, logo, slogan, and links** on it? That's the **Custom Tap-Screen Branding** add-on (see the Add-ons section).
-

10. Add-ons

Pro **includes the Hosted Business Page** free. These optional per-business upgrades pair well with a multi-location operation:

ADD-ON	PRICE/MO	WHAT IT DOES
Hosted Business Page	<i>Included</i>	Your customizable one-page website at /biz/you (\$4).
Custom Tap-Screen Branding	\$7.99	Your colors, logo, slogan & links on the customer tap page.
Advanced Analytics Pack	\$12.99	Best-performing tag zones, return-visit timing, busiest-hour heatmaps.
Map Priority Placement	\$14.99	A boosted, highlighted pin on the discovery map.
Contest & Scavenger-Hunt Builder	\$14.99	Build multi-stop scavenger hunts and prize contests (\$7).

Buying an add-on runs through secure checkout and activates automatically. An add-on applies to **one business** — buy it per location where you want it.

11. Billing, support & your account

- See your plan and tier under **Account** ([/account](#)); buy add-ons at **Checkout** ([/checkout](#)).
- Payments are processed securely by **Stripe** — Cirqlback never sees your card number, and prices are set server-side.
- **Priority support** is included with Pro — you're first in the queue.

12. Troubleshooting & FAQ

A customer says their reward won't work. Check the code's status — it may already be **redeemed** or **expired**.

Can customers cheat the punch card? No — per-tag cool-down, optional GPS proximity, and device fingerprinting prevent rapid repeat taps.

Do customers need an account? No. They're anonymous unless they share an email to save progress.

Can each location have its own hosted page and tags? Yes — each location is its own business profile with its own page, tags, and analytics.

I need more than 3 locations. Contact support — Pro covers up to 3; larger operations are handled case by case.

My hosted page isn't showing. Make sure you clicked **Save & publish** (not just Save). An unpublished page returns a "not available" message.

13. Your weekly rhythm

- **Daily:** redeem reward codes as customers present them (all locations).
- **Weekly:** compare locations in Analytics — which store and tag spot lead? Rebalance placement and offers.
- **Weekly:** send a Reminder to favoriters, and refresh each location's hosted-page specials.
- **Monthly:** review multi-store campaign performance and whether a contest would drive your next event.

On the smaller plan, or comparing? See the [Core Guide](#).
