

Cirqlback — Business Guide (Core Plan)

Business — Basic (Core plan) · User Manual

For: single-location local businesses running loyalty with Cirqlback on the **Core (\$19.99/mo)** plan — or the free **Starter** 6-month trial. **Log in at:** </auth> · **Your dashboard:** </merchant>

This is your complete how-to for running your business on Cirqlback — from first sign-in to daily operations. Everything a Core account can do is covered here, in the order you'll actually do it. Need more locations, unlimited taps, or the hosted page included free? See the [Pro Guide](#).

Quick start — your first live reward in ~15 minutes

1. **Create your account** at </auth> → sign up as a **Business**.
2. **Fill in your business profile** (name, address, hours) — this also puts your pin on the Discovery Map.
3. **Create a campaign** — e.g. a "Buy 5, get 1 free" loyalty card (\$2).
4. **Set up a Cirql tag** and link it to that campaign (\$3).
5. **Place the tag** on your counter and **tap it with your phone** to test.
6. Watch the first taps land in **Analytics** (\$6).

That's the whole loop. The rest of this guide goes deeper on each step and on growing from there.

1. Set up your business

1. Go to </auth> and choose **Create an account** → sign up as a **Business**.
2. Sign in and open your **Business Hub** at </merchant> — this is your control center.
3. Open **Settings** (</settings>) and complete your **business profile**:
 - **Name, category, description**
 - **Address** — places you on the **Discovery Map** so customers can find you
 - **Hours, phone, email, logo**

Your profile does double duty: it feeds both your **map pin** and your **hosted business page** (\$4). Fill it in once, thoroughly, and both look great.

Your plan at a glance (Core):

	CORE
Business locations	1
Campaigns	Unlimited
Customer taps / month	500
Cirql tags included	20
Analytics	Tap & redemption analytics
Hosted business page	Add-on (\$14.99/mo)
Support	Email

2. Create your rewards (campaigns)

A **campaign** is the rule behind a reward. From the Business Hub, click **Create Campaign** to open the guided **Campaign Builder** (Type → Details → Review → Complete).

The Campaign Builder walks you through picking a reward type, then the details.

Pick a type:

- **Discount Offer** — money off a purchase (e.g. "10% off," "\$5 off orders \$25+").
- **Loyalty Points** — reward return visits. Set a **tap goal** (e.g. 5) to make it a **punch card**: the reward unlocks every Nth tap.
- **Referral Bonus** — reward customers for bringing friends.

Then give it a **name** and **reward** (e.g. "Free coffee"), set a value if relevant, optionally require **GPS proximity**, and finish. Your campaign is **live** immediately and ready to attach to a tag.

Campaigns are private to you — only your business can edit or delete its own campaigns.

3. Set up your Cirql tags

A **Cirql tag** is an NFC sticker or stand at your counter that customers tap to earn. From the Business Hub, click **Program Tag** to open the **Cirql Tag Setup** wizard.

The Cirql Tag Setup wizard programs your tags in five guided steps.

1. **Label the tag** (e.g. "Front counter," "Patio") so your analytics show which spots perform best.
2. **Link it to a campaign** you created.
3. **Write it to a physical NFC tag.** Programming is done on an **NFC-capable Android phone** — hold the blank tag to the back of the phone when prompted. On a device without NFC, use the **Smart NFC Writer** option or the printable **QR code** as a backup.
4. **Place the tag** where customers naturally pause, and **tap it with your own phone** to confirm it works.

You can **rename, re-point, or deactivate** your own tags anytime, and each tag tracks its own tap count.

4. Launch your hosted business page

Give customers a polished one-page website — your brand, hours, specials, and your **live Cirql rewards** — hosted at cirqlback.com/biz/your-business. No web skills needed.

On **Core**, the Hosted Business Page is a **\$14.99/mo add-on**. (It's **included free on Pro**.)

Step 1 — Turn it on. In the **Add-ons** panel on your Business Hub, find **Hosted Business Page** and purchase it through secure checkout. It activates automatically.

The Add-ons panel. On Core, the Hosted Business Page is \$14.99/mo; it's free on Pro.

Step 2 — Make it yours. The **Hosted business page** editor appears on your Business Hub. Customize with simple controls — no layout can break:

- **Brand color** (pick any color or a swatch) and a **font** style
- A **hero** style and optional cover **image**
- **About** and **Specials** text
- Turn sections **on/off and reorder** them (About, Specials, Live Cirql Rewards, Hours, Gallery, Contact, Social)
- **Hours, contact, social links**, and a **photo gallery**

A **live preview** updates as you type.

Artisan coffee & daily tap rewards

Hours

Mon 09:00 – 17:00

Save first, then publish to make changes live.

The editor: fill in the form on the left, watch the live preview on the right.

Step 3 — Publish. Click **Save**, then **Save & publish**. You'll get your public link ([/biz/your-business](#)) and a view counter. Your active campaigns appear automatically in the **Live Cirql Rewards** section — publish once and they stay current.

Your published page — brand color, about, hours, and contact, all from your profile and editor.

Share your [/biz/...](#) link on Google, Instagram, and printed materials. To take it down, open the editor and click **Unpublish**.

5. Run the daily loyalty loop

Once tags are live, the loop runs itself:

- Customers **tap** → **earn** automatically — nothing to do per tap.
- When a customer completes a punch card or earns a discount, they show a **reward code**.
- **Redeem it:** look the code up in your dashboard and mark it redeemed. A redeemed code can't be reused.

Anti-abuse is built in: a per-tag cool-down, optional GPS proximity, and device fingerprinting stop rapid repeat taps, so the punch card can't be gamed.

6. Watch your numbers (analytics)

Open **Analytics** (</analytics>) for real figures from your taps and redemptions:

- **Total taps, active customers, rewards issued vs redeemed** (conversion rate)
- **Busiest hours** and your **peak window**
- **Top campaigns** and **top tag locations**
- A **recent-activity** feed of the latest taps and redemptions

Enter your sales data in the dashboard to unlock accurate revenue, average-order, and Cirql-driven-sales metrics.

Want deeper insight — best tag zones, return-visit timing, heatmaps? That's the **Advanced Analytics** add-on (\$8).

7. Keep customers coming back

- **Favorites & reminders:** customers can favorite your shop. From the **Reminders** panel, send them a nudge or offer ("Your card's almost full!"). It shows in their in-app feed.
- **Your tap screen:** by default it shows your business name and offer. Want your **colors, logo, slogan, and links** on it? That's the **Custom Tap-Screen Branding** add-on (see the Add-ons section).

8. Optional upgrades (add-ons)

Add-ons are per-business monthly upgrades you buy from the **Add-ons** panel. Available on any paid plan:

ADD-ON	PRICE/MO	WHAT IT DOES
Custom Tap-Screen Branding	\$7.99	Your colors, logo, slogan & links on the customer tap page.
Advanced Analytics Pack	\$12.99	Best-performing tag zones, return-visit timing, busiest-hour heatmaps.
Map Priority Placement	\$14.99	A boosted, highlighted pin on the discovery map.
Contest & Scavenger-Hunt Builder	\$14.99	Build multi-stop scavenger hunts and prize contests.
Hosted Business Page	\$14.99	Your customizable one-page website at /biz/you (\$4). <i>Free on Pro.</i>

Buying an add-on runs through secure checkout and activates automatically once payment succeeds.

9. Team up: group & neighborhood campaigns

You can **join open multi-store campaigns** so your shop is part of a "tap at 3 shops" trail — a great way to share foot traffic with neighbors. Find joinable campaigns in the **group-campaigns** panel on your Business Hub.

Invite & be invited. Beyond open campaigns, you can now **invite a specific business** to a campaign you created, and **request to join** another business's campaign — each side accepts or declines. If a campaign's reward is a **funded prize** (a real item, not just points), one **host** store funds it; the others drive traffic. When you accept a funded campaign you'll confirm you agree to owe the host a **tap-weighted share** of the reward cost when a customer completes the trail via your store.

Shared-campaign settlements. When you **host** a funded reward, the other stores owe you their share; when you're a **driver**, you owe the host. Your Business Hub shows **what you owe** and **what you're owed**, settled monthly.

Get paid automatically. Connect a **Stripe payout account** from the **Payouts** card and your owed share is transferred to you automatically when a settlement is paid out — no invoicing.

9b. Point perks, badges & recognition

Point perks. Let customers spend their loyalty points at your shop. In **Point perks** on your Business Hub, add a perk and its price (e.g. "Free drip coffee — 250 pts"). Customers redeem it in the Rewards store and show you the reward in-store. You set how many are available.

Badges (recognition). As your shop grows you earn **achievement badges** automatically (Buzzing at 100 taps, Community Favorite for unique customers). Customers can award you preset badges (Great Service, Hidden Gem), and your coordinator or an admin can too. These badges appear on your **hosted page** as social proof. You can also **award your best customers** a badge (VIP, Top Fan) — a nice personal touch.

Messages. Message your **community coordinator** and reply to **Cirqlback Support** right from your hub.

10. Billing & your account

- See your plan and tier under **Account** ([/account](#)).
- **Upgrade to Pro** or buy add-ons at **Checkout** ([/checkout](#)). Payments are processed securely by **Stripe** — Cirqlback never sees your card number, and the price is set server-side, so you're always charged the correct amount.
- On the **Starter** trial you may be offered a discounted rate to convert before the trial ends.

Core limits & when to upgrade: Core covers **1 location** and **500 taps/month**. If you add locations, outgrow the tap allowance, or want the hosted page and priority support included, [move to Pro](#).

11. Troubleshooting & FAQ

A customer says their reward won't work. Check the code's status — it may already be **redeemed** or **expired**.

Can customers cheat the punch card? No — per-tag cool-down, optional GPS proximity, and device fingerprinting prevent rapid repeat taps.

Do customers need an account? No. They're anonymous unless they share an email to save progress.

Where should I place tags? Anywhere customers naturally pause — the register, the table, the exit. Label each so analytics show which spots perform best.

My hosted page isn't showing. Make sure you clicked **Save & publish** (not just Save), and that the Hosted Business Page add-on is active. An unpublished or lapsed page returns a "not available" message.

How do I get more taps or locations? Upgrade to **Pro** (3 locations, unlimited taps, 50 tags, hosted page included, priority support).

12. Your weekly rhythm

A simple checklist to keep the loop healthy:

- **Daily:** redeem reward codes as customers present them.
 - **Weekly:** glance at Analytics — which tag spot and campaign are winning? Adjust placement or offers.
 - **Weekly:** send one Reminder to favoriters (a fresh offer or "almost full" nudge).
 - **Monthly:** refresh your hosted page specials, and review whether an add-on (or Pro) would pay for itself.
-

Need the bigger toolkit — multiple locations, unlimited taps, the hosted page included, contests, and multi-store campaigns? See the [Pro Guide](#).
