

Cirqlback — Community Coordinator Guide

Community Coordinator · User Manual

For: Community Coordinators — the local partners who grow and manage Cirqlback in a city or region, onboard businesses, run area-wide campaigns, and earn a **revenue share**. **Log in at:** </auth> · **Your dashboard:** </coordinator>

Getting your account: Coordinators are set up by a Cirqlback administrator (there's no public sign-up). Once your account exists, log in at </auth> and you'll see the **Territory** area in your navigation. This guide is your complete playbook for running your territory as a business.

Quick start — your first week

1. **Open your dashboard** at </coordinator> and review your **territory overview** (\$2).
2. **Work your prospect list** — your territory is pre-seeded with local leads. Search, review, and cull the ones that don't fit (\$3).
3. **Onboard and verify** your first businesses (\$3).
4. **Launch a region campaign** and **feature** a standout shop on the map (\$4).
5. **Check Revenue & licensing** to see how your share accrues (\$6).

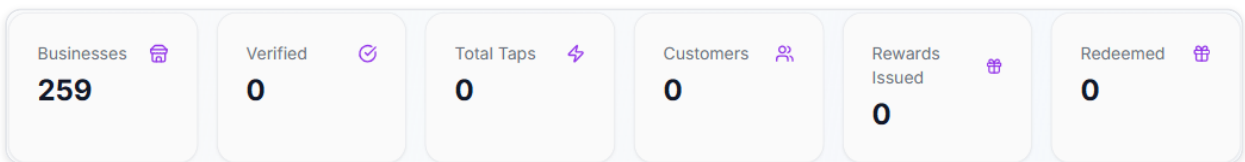

1. Your role in one minute

You're the boots-on-the-ground owner of a **territory** (a city/region). You:

- **Recruit and onboard** local businesses onto Cirqlback.
- **Verify** businesses and keep your territory list clean.
- Run **region-wide, multi-store campaigns** and control what's featured on the map.
- Provide local support and set **regional welcome messages and offers**.
- **Earn a share** of the subscription and add-on revenue from the businesses in your territory.

2. The Coordinator Dashboard (</coordinator>)

When you sign in, your dashboard shows a **territory overview** — live totals for your region: businesses, verified businesses, taps, active customers, and rewards issued/redeemed.

Your territory overview — live totals across every business in your region.

Below it you'll find **business management**, a **multi-store campaign builder**, **templates & regional tools**, and your **Revenue & licensing** panel. Everything is **scoped to your territory** — you only ever see and manage your own region.

3. Onboarding & managing businesses

Your territory comes pre-seeded with **prospects** — real local businesses (unclaimed, unverified, and hidden from the public map) for you to work through. The **Businesses in your territory** table is your command center.

Business	Category	Status	Taps	Customers	Issued	Redeemed	Actions

Cheers Summitview Avenue, Yakima, WA	Coffee / Café	Unverified	0	0	0	0	☆	Verify	Reject	🗑️

The businesses table: search, review, verify, feature, or remove each business.

Find a business fast. Use the **search box** to filter the table by **name, category, or address** — handy when your list runs long.

Onboard a business. In **Onboard a business**, pick a **store template** (Café, Restaurant, Retail) to prefill sensible defaults, enter the name, choose the territory, and click **Onboard**. New businesses start **unverified**.

Verify or reject. Review each business and mark it **Verified** (a legitimate, active local shop) or **Rejected**.

Feature on the map. Toggle the **star** to feature a shop — featured businesses float to the top of the Discovery Map with a highlighted marker. Use it to spotlight new or seasonal businesses.

Cull prospects. For an **unclaimed** prospect that doesn't fit, click the **trash icon** to remove it from your list. (Claimed businesses — ones with a real owner — can't be removed this way.)

Get a tailored pitch. Click the **megaphone** on any row for a ready-made pitch built for *that* business's type — the opening line, what to lead with, the money math, the objection to expect, and a recommended plan/add-on bundle, all personalized with the business name. Hit **Print one-pager** for a leave-behind. (See the [Sales Playbook](#) for the full method.)

How to pitch Curly's Gleed Tavern
×

Bar / Brewery / Winery from category "Bar / Pub"

OPEN WITH
"Want Curly's Gleed Tavern to be a must-stop on a tasting trail that sends groups from tap room to tap room?"

THEIR PAIN
Discovery — people don't know they exist, and weekend groups just follow the crowd.

LEAD WITH

- The cross-business tasting trail (the killer feature here)
- Map discovery so tourists and locals find you
- Contests & scavenger hunts for events and releases

PICTURE IT
"A "Yakima Ale Trail" — tap at four spots, earn a prize. Groups make a day of it and land on Curly's Gleed Tavern because you're on the map and the trail."

THE MONEY

The Pitch Assistant: a tailored, personalized pitch for each prospect, with a printable one-pager.

Everything is scoped to your territory — attempts to touch a shop outside your region are blocked. Businesses you onboard can also run their own **hosted page** and campaigns; see the Business guides.

4. Region-wide, multi-store campaigns

Your **campaign builder** creates group campaigns that span several stores in your territory — the "Coffee Loop," "Tap Trail," or "Taste Tour" style experiences:

1. Open **Multi-store campaigns** → **New**.
2. Set the **rule** (e.g. *tap N of M stores*, or *all stores*), the **required stops**, and the **reward**.
3. Pick the member stores from your territory.
4. Publish. The campaign appears on the **Discovery Map** as a **Group Trail**, and customers' cross-store progress is tracked automatically.

Map placement control: you can **feature** a store or a campaign on the map. Featured shops float to the top with a highlighted marker, and featured trails get a badge — use this to spotlight new businesses, seasonal events, or scavenger routes.

5. Templates & regional tools

- **Campaign templates** — apply a ready-made campaign (e.g. *Summer Loyalty*, *Scavenger Hunt*, *Holiday Bonus*) to **all your stores at once** with a click.
- **Regional welcome message** — set a default welcome shown to new businesses in your territory.
- **Discount & trial codes** — issue regional offer codes (percent, fixed, or trial) scoped to your territory. Codes are unique; the system prevents duplicates.

5b. Your coordinator toolkit (support, fairness & recognition)

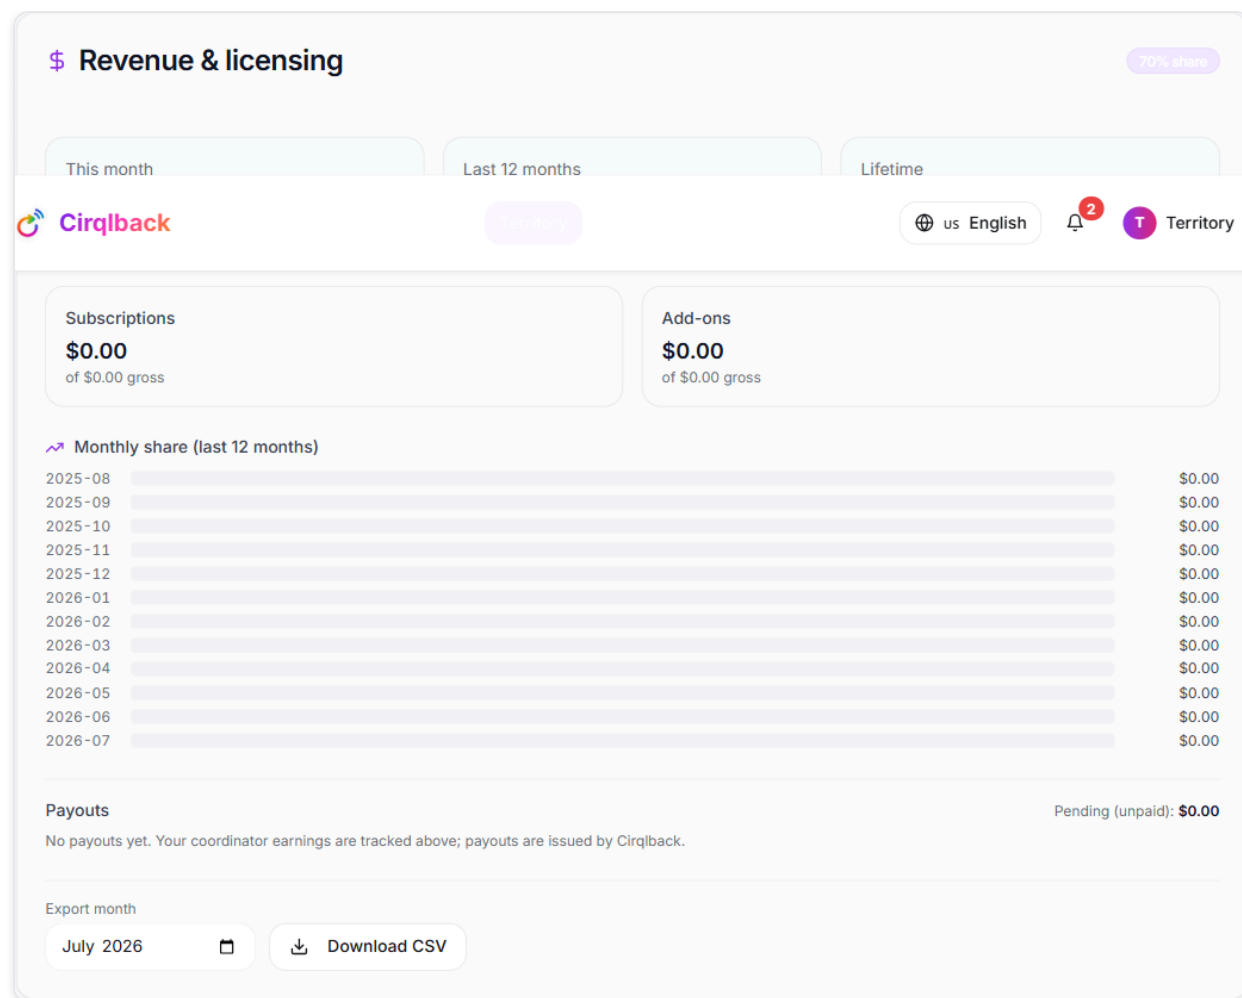

Everything here is scoped to **your territory** — you can only touch the businesses and activity in your region.

- **Messaging.** Start a thread with any **business in your territory** (and reply to **Cirqlback Support** admin threads). Send **announcements** to your businesses. All from the Coordinator Hub.
- **Reward & balance fixer.** When something goes wrong, look a customer up by email and **correct their points or rewards** — but only for customers active at your territory's businesses. Every change is logged.
- **Funded group campaigns.** When you run a region-wide campaign with a **funded prize**, you name the **host** business that funds and redeems it; the other stores reimburse a **tap-weighted share**. Pick points (platform-funded) or a funded prize in the campaign builder.
- **Shared-campaign settlements & payouts.** Roll a host's owed contributions into a **monthly statement**, then **pay it out via Stripe** to the host's connected account (or mark it paid manually). Territory-scoped.
- **Badges.** Award your territory's businesses **badges** (Rising Star, Community Pillar) — recognition that shows on their hosted page. Custom badges too.
- **Passports / collections.** Build a **Passport** across your territory's shops ("visit all the coffee spots") — completing it grants customers bonus points and drives discovery to businesses that need traffic.
- **Territory leaderboard.** See your region's **top customers** (this month or all-time).

6. Revenue & payouts

This is how you get paid.

Your share. You earn a **percentage of gross revenue** — both **subscriptions and add-ons** — from businesses in your territory. The default is **70%** (you) / **30%** (platform); an administrator can set your rate anywhere from **50% to 100%**. Your dashboard shows your current **share %**.

The Revenue & licensing panel — share %, this-month / 12-month / lifetime earnings, and a subscription-vs-add-on split.

The panel shows:

- **This month**, **last 12 months**, and **lifetime** earnings (your share, plus gross and charge counts).
- A **subscription vs add-on** breakdown and a **12-month trend**.
- Your **unpaid (pending)** balance and a list of **payouts** with their status.
- A **CSV export** (one month or all) — one row per charge with date, business, source, plan/description, gross, share %, and your share.

How payouts work. Payouts are **reporting-based**: an administrator periodically **generates a payout** from your unpaid earnings and marks it **paid** once the money is sent. Each earning row **snapshots your share rate at the time of the charge**, so a later rate change never affects past earnings.

Plan your growth. The **Grow your earnings** tool in this panel lets you model your territory at your share rate — dial in how many Core shops, Pro shops, and hosted-page add-ons you'll sign, and it shows your projected monthly and yearly income. Set a **monthly goal** and it tells you exactly how many more shops you need to hit it.

Grow your earnings

Model your territory at your 70% share. These are projections to aim for — not current earnings.

Core shops

\$19.99/mo

−

10

+

Pro shops

\$49.99/mo

Projected monthly (your share)

Per year

\$262/mo

\$3,149

🎯

Monthly goal

\$ 500

You're at \$262/mo (52% of goal) — about 17 more Core shops to reach \$500/mo.

The "Grow your earnings" tool — model your territory and track progress toward a monthly goal.

7. A day-in-the-life checklist

- ☐ Check your **territory overview** for new activity and taps.
- ☐ **Search and cull** your prospect list; **verify** newly onboarded businesses.
- ☐ Onboard a new shop or two (use a template to move fast).
- ☐ Refresh or launch a **region campaign**; feature a standout shop on the map.
- ☐ Issue a **regional offer code** for a local event.
- ☐ Review your **earnings** and export a CSV at month-end.

8. FAQ

Can I see other coordinators' regions? No — you only see and manage your own territory.

Who sets my revenue share? An administrator; the default is 70% and it can be set 50–100%. It applies to future earnings only.

When do I get paid? Payouts are generated and marked paid by an administrator from your unpaid balance; track them in your Revenue panel.

What are the prospects already in my list? Pre-seeded local leads for you to work — unclaimed, unverified, and off the public map until you verify or a real owner claims them.

Can I onboard a business in another city? Only within a territory you manage. If you expand, an admin can assign you additional territories.

How do businesses I onboard get charged? Through Cirqlback's standard secure (Stripe) checkout — and your share of those charges is attributed to you automatically.

Questions about the platform itself go to your Cirqlback administrator — see the [Admin Guide](#).
