

## Cirqlback — Community Coordinator Guide

Community Coordinator · User Manual

**For:** Community Coordinators — the local partners who grow and manage Cirqlback in a city or region, onboard businesses, run area-wide campaigns, and earn a **revenue share**. **Log in at:** </auth> → your dashboard at </coordinator>

**Getting your account:** Coordinators are set up by a Cirqlback administrator (there's no public sign-up for coordinators). Once your account is created, log in at </auth> and you'll see the **Territory** area in your navigation.

### 1. Your role in one minute

You're the boots-on-the-ground owner of a **territory** (a city/region). You:

- **Recruit and onboard** local businesses onto Cirqlback.
- **Verify** businesses and manage their tags.
- Run **region-wide, multi-store campaigns** and control what's featured on the map.
- Provide local support and set **regional welcome messages and offers**.
- **Earn a share** of the subscription and add-on revenue from the businesses in your territory.

### 2. The Coordinator Dashboard ( </coordinator> )

When you sign in, your dashboard shows:

- **Territory overview** — totals for your region: businesses, verified businesses, taps, active customers, rewards issued/redeemed, points awarded, plus a **per-store** performance table.
- **Business management** — onboard, verify, and manage the shops in your territory.
- **Multi-store campaign builder** — create region-scoped group campaigns and control map placement.
- **Templates & regional tools** — 1-click campaign templates, a welcome message, and discount/trial codes.
- **Revenue & licensing** — your earnings, trends, CSV export, and payout status.

Everything you see is **scoped to your territory** — you only ever see and manage your own region.

### 3. Onboarding & managing businesses

From the **business management** section:

1. **Onboard a business** — add a shop into one of your territories. Pick a **store template** (e.g. café, restaurant, retail) to prefill sensible defaults, enter the name, and (optionally) link the owner by email. New businesses start **unverified**.
2. **Verify** — review a business and mark it **Verified** (or **Rejected**). Verification signals a legitimate, active local business.
3. **Tag reset / reassign** — if a shop's Cirql tag needs to be rotated or moved to a new campaign, you can **reset** a tag (rotates its identifier and zeroes its counters) and optionally reassign it.

You can only manage businesses **inside your own territory** — attempts to touch a shop outside your region are blocked.

### 4. Region-wide, multi-store campaigns

Your **campaign builder** lets you create group campaigns that span several stores in your territory — the "Coffee Loop," "Tap Trail," or "Taste Tour" style experiences:

1. Open **Multi-store campaigns** → **New**.
2. Set the **rule** (e.g. *tap N of M stores*, or *all stores*), the **required number of stops**, and the **reward**.
3. Pick the member stores from your territory (a store picker shows your shops).
4. Publish. The campaign appears on the **Discovery Map** as a **Group Trail**, and customers' cross-store progress is tracked automatically.

**Map placement control:** you can **feature** a store or a campaign on the map (a star toggle). Featured shops float to the top with a highlighted marker, and featured trails get a badge — use this to spotlight new businesses, seasonal events, or scavenger routes.

---

## 5. Templates & regional tools

- **Campaign templates** — apply a ready-made campaign (e.g. *Summer Loyalty*, *Scavenger Hunt*, *Holiday Bonus*) to **all your stores at once** with a click.
  - **Regional welcome message** — set a default welcome shown to new businesses in your territory.
  - **Discount & trial codes** — issue regional offer codes (percent, fixed, or trial) scoped to your territory. Codes are unique; the system prevents duplicates.
- 

## 6. Revenue & payouts

This is how you get paid.

**Your share.** You earn a **percentage of gross revenue** — both **subscriptions and add-ons** — from businesses in your territory. The default is **70%** (you) / **30%** (platform). An administrator can set your rate anywhere from **50% to 100%** for special arrangements. Your dashboard shows your current **share %**.

**The Revenue & Licensing panel** shows:

- **This month**, **last 12 months**, and **lifetime** earnings (your share, plus the gross and charge counts).
- A **subscription vs add-on** breakdown.
- A **12-month trend**.
- Your **unpaid (pending)** balance and a list of **payouts** with their status.
- A **CSV export** (pick a month or export all) — one row per charge with date, business, source, plan/description, gross, share %, and your share, formatted for spreadsheets/accounting.

**How payouts work.** Payouts are **reporting-based**: an administrator periodically **generates a payout** from your unpaid earnings and marks it **paid** (with a reference/notes) once the money is sent. Each earning row **snapshots your share rate at the time of the charge**, so if your rate changes later, past earnings are unaffected. You can always see pending vs paid amounts in your panel.

---

## 7. A day-in-the-life checklist

- ☐ Check your **territory overview** for new activity and taps.
  - ☐ **Verify** any newly onboarded businesses.
  - ☐ Onboard a new shop or two (use a template to move fast).
  - ☐ Refresh or launch a **region campaign**; feature a standout shop on the map.
  - ☐ Issue a **regional offer code** for a local event.
  - ☐ Review your **earnings** and export a CSV at month-end.
- 

## 8. FAQ

**Can I see other coordinators' regions?** No — you only see and manage your own territory.

**Who sets my revenue share?** An administrator; the default is 70% and it can be set 50–100%. It applies to future earnings only.

**When do I get paid?** Payouts are generated and marked paid by an administrator from your unpaid balance; track them in your Revenue panel.

**Can I onboard a business in another city?** Only within a territory you manage. If you expand, an admin can assign you additional territories.

**How do businesses I onboard get charged?** Through Cirqlback's standard secure (Stripe) checkout — and your share of those charges is attributed to you automatically.

---

*Questions about the platform itself go to your Cirqlback administrator — see the [Admin Guide](#).*
