

Frequently Asked Questions

Answers to common questions about Cirqlback. For step-by-step help, use the **"Need help?"** assistant inside your dashboard, or see the [user guides](#). For legal details, see our [Terms of Service](#) and [Privacy Policy](#).

For customers

What is Cirqlback?

A local loyalty and discovery app. You **tap** an NFC tag (or scan a QR code) at a participating shop to earn points, rewards, streaks, and badges — and to discover more local businesses.

Do I need an app or an account?

No app to install, and you can start anonymously. You can optionally add an email to save your progress across devices and unlock more features.

How do I earn points?

Tap at participating businesses. You can also earn from streaks, referrals, the daily spin, seasonal events, and completing passports/collections.

What can I do with points?

Redeem them for business perks and platform rewards, and enter prize draws. Points have **no cash value** and can't be exchanged for money.

Do points or rewards expire?

They can, depending on the reward and any promotion. Check the reward details. See the [Terms](#) for the full rules.

Is my data private?

We're privacy-light by design — anonymous by default, minimal data, and we don't sell your personal information for money. See the [Privacy Policy](#).

Is tapping safe?

Yes. An NFC tap just opens a web link; it can't access your personal data or install anything.

For businesses

What does Cirqlback cost?

There's a free **Starter** trial, then **Core** and **Pro** subscriptions, plus optional add-ons. See the price sheet or the [Merchant Agreement](#).

What's the difference between Core and Pro?

Pro includes more locations, a hosted business page (free on Pro), priority support, and the ability to create multi-store campaigns. Core covers the essentials. Your dashboard shows exactly what your plan includes.

Do I need special hardware?

Just NFC tags or printed QR codes at your counter — no POS integration required.

How do multi-store campaigns share reward costs?

When several stores fund a shared reward, the cost is split **tap-weighted** across the stores a customer visited, the host fronts it, and settlements are reconciled and paid via Stripe. See the [Merchant Agreement](#), Section 4.

How do I get paid when I host a funded reward?

Through **Stripe Connect** to your connected account, after completing Stripe's onboarding.

Can I cancel anytime?

Yes. Subscriptions auto-renew until you cancel; cancellation takes effect at the end of your billing period. See the [Merchant Agreement](#), Section 2.

For Community Coordinators

What is a Coordinator?

A local partner (an **independent contractor**) who grows and supports Cirqlback businesses in a territory and earns a **revenue share** (default **70%**).

Am I an employee?

No — you're a **1099 independent contractor**. You control how you work, use your own equipment, and handle your own taxes. See the [1099 Guide](#) and [Contractor Agreement](#).

How and when do I get paid?

You earn a share of revenue actually collected from businesses in your territory, reconciled to a statement and paid out on Cirqlback's schedule. Refunds/chargebacks reduce the associated share.

Will I get a tax form?

If you're paid \$600+ in a year, you'll receive a **1099-NEC**. Set aside part of each payout for taxes — see the [1099 Guide](#).

Trust & safety

How do you keep the platform secure?

Payments run through PCI-compliant Stripe (we don't store card numbers), traffic is encrypted, and we use security headers, rate limiting, access controls, and an admin audit log. See our [security safeguards](#) overview.

How do I report a problem or abuse?

Contact **[SUPPORT EMAIL]**. For privacy requests, **[PRIVACY EMAIL]**. For legal matters, **[LEGAL EMAIL]**.

Have a question that isn't here? Reach us at [SUPPORT EMAIL].
