

Cirqlback — Business Guide (Pro Plan)

Business — Pro plan · User Manual

For: growing and multi-location businesses on the **Pro (\$49.99/mo)** plan. **Log in at:** </auth> → Merchant Dashboard at </merchant>

Pro includes **everything in Core (Basic)** — so start with the [Basic Guide](#) for the fundamentals (creating campaigns, setting up tags, redeeming rewards, analytics). This guide covers what Pro adds.

1. What Pro gives you

	CORE (BASIC)	PRO
Business locations	1	Up to 3
Customer taps / month	500	Unlimited
Cirql tags included	20	50
Support	Email	Priority
Campaigns	Unlimited	Unlimited
Add-ons	Available	Available

Pro is the plan for a busy shop, a small chain, or anyone whose taps outgrow the Core allowance.

2. Running multiple locations

With up to **3 locations** on Pro:

1. Add each location as its own business profile in the dashboard (name, address, category).
2. Each location gets its **own tags, campaigns, and analytics** — so you can compare performance store-to-store.
3. Every location appears on the **Discovery Map** with its own pin.

Running **more than 3** locations, or a whole city? That's typically handled by a **Community Coordinator** (a territory partner) — talk to your Cirqlback contact.

3. Unlimited taps = campaigns without limits

On Core you have a 500-tap monthly allowance; on **Pro there's no tap cap**, so you can run high-traffic promotions, event days (First Fridays, Small Business Saturday), and always-on loyalty without watching the meter.

4. Add-ons that pair well with Pro

Add-ons are per-business monthly upgrades from the **Add-ons** panel. They're available on any paid plan, but Pro shops tend to use them most:

ADD-ON	PRICE/MO	WHY PRO SHOPS LOVE IT
Advanced Analytics Pack	\$12.99	Best tag zones, return-visit timing, busiest-hour heatmaps, redemption funnel — essential once you have real volume.
Custom Tap-Screen Branding	\$7.99	Put your colors, logo, slogan, and links on the tap page for a branded experience.
Map Priority Placement	\$14.99	Float to the top of the discovery map with a highlighted pin.
Contest & Scavenger-Hunt Builder	\$14.99	Build your own multi-stop hunts and prize contests (see \$5).

Each add-on activates automatically after secure Stripe checkout.

5. Contests & scavenger hunts (with the Builder add-on)

With the **Contest & Scavenger-Hunt Builder** add-on you can create your own multi-stop experiences:

1. Open the **Scavenger-Hunt Builder** in your dashboard.
2. Name the hunt and set the **prize** and the **number of stops** required.
3. Add the participating stores (your own locations, and any you're allowed to include).
4. Publish — customers see it on the map as a **Group Trail**, tap their way through the stops, and unlock the prize once. It runs on the same tap loop and map surfacing as built-in group campaigns.

6. Multi-store group campaigns

Beyond your own hunts, Pro shops can **join open group campaigns** (city-wide "tap at 3 shops" trails) and be **surfaced on the map** as part of them — a strong way to trade foot traffic with neighboring businesses. Manage joins from the group-campaigns panel in your dashboard.

7. Analytics at scale

The standard **Analytics** dashboard (</analytics>) gives totals, conversion, busiest hours, top campaigns/locations, and a live activity feed. With **Advanced Analytics** you additionally get:

- **Best-performing tag zones** (which physical spots convert best)
- **Return-visit timing** (how long before customers come back)
- **Busiest hours & days** heatmaps
- A detailed **redemption funnel** (taps → issued → redeemed)

Enter your **daily sales data** to turn on accurate revenue, average order value, and Cirql-driven-sales figures.

8. Billing & support

- Manage your plan under **Account** (</account>); upgrade/downgrade and buy add-ons via **Checkout** (</checkout>).
- Payments run through **Stripe**; prices are set server-side, so you're always billed the correct amount.
- **Priority support** is included with Pro — you're front of the queue for help.

9. Tips & FAQ

Should I brand my tap screen? If you have a recognizable brand, yes — the Custom Branding add-on makes the experience feel like *yours*, not generic.

How do I know which tags work best? Label every tag by placement; the standard analytics show **top tag locations**, and Advanced Analytics shows **best tag zones** and return timing.

Can I move a tag to a new spot? Yes — re-point or re-label any of your tags from the dashboard; its tap count follows the tag.

What happens if I downgrade to Core? You keep your data; the Core caps (1 location, 500 taps) apply going forward.

I need more than 3 locations. Reach out about a **Coordinator/enterprise** arrangement for larger footprints.

Fundamentals live in the [Basic Guide](#). This guide is Pro on top of that.
