

CIRQLVERSE — Quest & Content Compendium

A complete catalogue of everything the flagship world runs on today: every quest type, every campaign, every goal track, and a ring-by-ring map of rings 0–13. This is the reference we plan the next 12 rings against.

Generated from the live game code — authored quests, the procedural quest generator, co-op campaigns, journeys, and the daily/seasonal loops.

At a glance

System	What it is	How many	Where it lives
Authored quests	Hand-written onboarding + a puzzle + a cross-ring errand	6	<code>cirql-quests.ts</code>
Procedural ring quests	6 reusable <i>shapes</i> generate 1 main + N side quests per ring	~74 through ring 13 (caps at 9/ring)	<code>cirql-quest-gen.ts</code>
Co-op campaigns	Multi-step party adventures with a shared waypoint	5	<code>cirql-campaigns.ts</code>
Flagship journeys	Personal epics tracking a cumulative metric	4	<code>cirql-journeys.ts</code>
Renown ladder	Earned-not-spent rank track that gates elite content	8 ranks	<code>cirql-renown.ts</code>
Daily / seasonal / holidays	One rotating daily + weekend + real-world holiday boosts	3 tasks · 10 holidays	<code>cirql-daily.ts</code>

Two currencies / tracks. **SPARQS** = the spend currency (quests + dailies pay it). **Renown** = personal standing, *earned and never spent*; it climbs a rank ladder and gates the hardest content.

The Anatomy of a Ring

Every procedural ring (2 and onward) is composed the same way, then dressed by its biome. This is the skeleton the next 12 rings will fill:

- **Two docks** — inward (toward home) and onward (into the fog).
- **A winding spine** from the inward shore to a central **beacon hub**, lined with thicket hedges that guide without trapping (Mana-World-style soft-guidance).
- **A keeper** at the hub (offers the ring's main quest) + a **wanderer** down the trail (errand/delivery target) + **sider NPCs** spread along the spine (one per side quest).
- **A focal landmark** (the biome's signature set-piece) that doubles as a quest beat.
- **1–3 sub-realms** reached by portals — a *cave*, a *hollow tree*, or a *cloud stair* (winter gets a *storm* you brave instead).
- **A two-ended tunnel** shortcut across the island.
- **A gathering spot** — ring 2 has the **Cirql Drive-In**; every other ring has **The Commons** (bonfire).
- **Biome dressing** — signature flora, geography, water, groundcover, ambient critter, and a **stateful hero creature** that reacts to you.
- **Collectibles** — lanterns, crystals/shards, and wisps that the quest generator targets.

Rings grow as you sail out (radius 430 → 1160+ by ring 13), so outer rings hold more of everything — more quests, more sub-realms, more landmarks.

Currencies & Progression

The Renown ladder (8 ranks)

Renown rises as you finish quests and campaigns — more the farther out you sail — and gates elite content.

Rank	Renown needed	Title feel
1	0	Newcomer
2	20	Wayfarer
3	55	Pathfinder
4	120	Voyager
5	240	Trailblazer
6	430	Cartographer
7	700	Circle-Keeper
8	1,100	Luminary

A quest awards $2 + \text{tier}$ Renown (tier = ring index - 1); the main quest pays full, side quests ~60%.

Flagship journeys (personal epics)

Long-horizon tracks that read cumulative progress and pay Renown at each milestone (8 / 15 / 25 / 40 / 60 / 80 Renown per step).

Journey	Tracks	Milestones
 The Widening Sea	rings reached	3 · 6 · 10 · 16 · 24
© Cartographer's Circles	circles graduated	1 · 3 · 6 · 12
 Founding a Homestead	CIRQLSPACE land tier	1 · 3 · 5 · 6
◆ The Keeper's Ledger	quests completed	5 · 15 · 40 · 100

Note: The Widening Sea already targets **24 rings** — the horizon the next 12 rings extend toward.

Authored Quests (hand-written)

These six are bespoke — the onboarding chain, a discovery puzzle, and a cross-ring errand.

1. Find Your Feet — *Find Your Feet* → *The Lantern Path* → *The CirqlCade Door* (chain)

- **Giver:** the keeper · **Reward:** 3 sparqs
- Walk to the western glimmer and back. Teaches the *walk* verb. Auto-chains into...

2. The Lantern Path

- **Auto-chained** · **Reward:** 4 sparqs
- Light 3 path lanterns (press E by each). Teaches *interact*. Auto-chains into...

3. The CirqlCade Door

- **Auto-chained** · **Reward:** 5 sparqs
- Step inside CirqlCade. Teaches *enter*.

4. The Sunken Runes (puzzle — *the one true set-piece*)

- **Granted by:** a runestone tablet in a hidden grove (discovery-driven, no giver) · **Reward:** 15 sparqs
- "*Four runes ring the shrine. Wake them all — save the second, which must sleep.*" Match the runes to the tablet's clue, then enter the shrine that opens. This is the model for what we want **more** of.

5. A Word to the Neighbours (cross-ring errand)

- **Giver:** the keeper · **Reward:** 14 sparqs
 - Gather word at the Town Commons (ring 1) → carry it home to Cirqla (ring 0). Demonstrates multi-ring objectives with a moving waypoint.
-

Procedural Ring Quests (the engine that scales)

Each ring from 2 outward gets **one main quest** (keeper, at the hub, the onward through-line) plus a **scaling number of side quests** (from sider NPCs). The generator picks from **six shapes**, parameterised by the ring's props, then scales difficulty + reward by how far out you are.

The six quest shapes

Shape	Objective	Notes
Kindle	Light N lanterns of the ring	N grows with tier (2 → up to all)
Gather	Walk over N scattered wisps	N grows with tier (3+)
Errand	Hear the wanderer's news → report back	2-step
Delivery	Carry a parcel out to the wanderer	1-step
Discover	Seek the ring's singing shard (a crystal)	follow-the-glimmer
Wayfind	Scout the onward shore (main-quest through-line)	main quests only

Objective verbs the engine understands: reach · interact · enterWonders · lightLanterns · solvePuzzle · gather · deliver.

Escalation & reward scaling

- **Main quests escalate** on deeper rings: tier ≥ 2 adds "*pay respects at the landmark*"; tier ≥ 4 adds "*chart the onward shore*" — so an outer main quest is a 3-step expedition, not a fetch.
- **Reward:** main sparqs = `min(60, 6 + tier·3)` ; side ≈ 70% of that. Renown scales with tier.

Side-quest scaling per ring

`side quests = min(8, floor(ring / 1.5))` — so rings ramp from 2 quests up to a 9-quest destination:

Ring	Main + side = total
2	1 + 1 = 2
3–4	1 + 2 = 3
5	1 + 3 = 4
6–7	1 + 4 = 5
8	1 + 5 = 6
9–10	1 + 6 = 7
11	1 + 7 = 8
12–13	1 + 8 = 9

~74 quests exist through ring 13, reaching ~100 by ring 15.

Honest note for planning: the procedural quests are powerful for *coverage* but they are six shapes wearing different names — "Kindle Cinderstrand," "Gather the Emberfall Wisps," etc. This is exactly the "same stuff over and over" to break up. The authored *Sunken Runes* puzzle is the only true set-piece. The next 12 rings should add **new shapes + hand-authored landmark quests** on top of the generator.

Co-op Campaigns (party adventures)

Five multi-step campaigns a party runs together with one shared, moving waypoint. Difficulty tiers: **Chill · Quick · Epic**. Every current campaign plays out on the Town / ring 1–2.

Campaign	Difficulty	Party	Reward (each)	Gate	Steps
The Lantern Vigil	Chill · newbie	2–4	12	—	Gather → light lanterns → attune at CirqlCade → regroup (4)
The Wonders Circuit	Quick	2–4	10	—	Meet → each play a Wonder → regroup (3)
Shoreline Wander	Chill · newbie	2–5	8	—	Western shore → coast to dock → back (3)
The Outer Passage	Epic	2–5	22	Rank 2	Town Commons → next shore's Commons → Drive-In show → sail home (4)
Wonders Marathon	Epic	3–5	20	Rank 3	Rally → shore → dock → lantern path → CirqlCade (5)

Matchmaking is PII-free: posters pick from fixed tags (Chill pace · Quick run · New players welcome · Thorough · No mic needed · Friendly).

Planning note: all five campaigns live on the Town. There are **zero campaigns set on the outer biome rings** — a wide-open lane for the next 12 rings (multi-stage, difficult, Renown-gated expeditions across the new shores).

Daily, Seasonal & Holiday Loops

The rotating daily (one per UTC day, same for everyone)

Task	Do this	Base reward
Attune to a Wonder	Play any CirqICade game	8 sparqs
Answer the Sea	Sail to a shore you've never reached	8 sparqs
A Keeper's Task	Complete any shore keeper's quest	8 sparqs

Events (multiply the daily reward)

- **Weekend Lantern Festival** 🏮 — Sat/Sun, ×2 sparqs.
 - **Real-world holidays** (local calendar, take precedence): New Year ×3 · Valentine's ×2 · Fourth of July ×2 · Halloween ×2 · Thanksgiving ×2 · Christmas Eve ×2 · **Christmas ×3** · Easter ×2 · Memorial Day ×2 · Labor Day ×2.
-

Ring-by-Ring Map (rings 0–13)

The world today. Ring 0–1 are hand-authored; 2+ are generated. **Hero fauna** is the stateful creature that reacts to you on that shore.

Ring	Name	Biome	Landmark	Sub-realms	Quests	Hero fauna
0	CIRQLSPACE	home (authored)	your homestead	cave (to Town)	onboarding chain	—
1	Town	authored	Town Hall / CirqlCade	cave	authored + campaigns	—
2	Mistcrest	 aurora	The Great Crystal	cloud stair	2 · +Drive-In	caribou · snow-hare
3	Lumenhaven	 autumn	The Stone Circle	hollow tree	3	squirrel · deer
4	Cinderstrand	 canyon	The Old Ruin	cave	3	crystal-moth
5	Cinderwood	 winter	The Great Crystal	the storm	4	snow-fox · snow-hare
6	Verdantcrest	 ember	The Old Ruin	cave · cave	5	salamander
7	Frostreach	 meadow	The Great Tree	hollow tree · cave	5	deer · hare
8	Cindervale	 woodland	The Great Tree	hollow tree · cave	6	deer · rabbit · fox
9	Whispermarsh	 savanna	The Great Tree	hollow tree · cave	7	gazelle
10	Cinderreach	 desert	The Old Ruin	cave · cave	7	fennec
11	Emberfall	 marsh	The Great Tree	hollow tree · cave	8	newt
12	Coralreach	 tropical	The Falls	cave · hollow tree	9	tree-frog
13	Hollowwilds	 coast	The Lighthouse	cloud stair · cave · hollow tree	9	crab

Naming quirk to fix: procedural names are drawn from a word-pool independent of biome, so "Cinderwood" lands on the **winter** ring and "Frostreach" on the **meadow** ring. The next 12 rings (and ideally a retro-fit of these) should use **biome-aware naming**.

Observations → what the next 12 rings should add

What we have is a strong *skeleton* and *coverage engine*. What it lacks is **memorable, unique, hand-authored moments**. Going into the ring 13–24 brainstorm, the opportunities are:

1. **New quest shapes** beyond the six (escort, defend, build/restore, multi-part mystery, timed, choice-driven).
2. **Authored landmark set-pieces** per ring — a Sunken-Runes-caliber puzzle or story beat that's *this ring's thing*.
3. **Outer-ring co-op campaigns** — multi-stage, difficult, Renown-gated expeditions across the new biomes (today all 5 campaigns are on the Town).
4. **Sub-realm payoffs** — caves/hollow-trees/cloud-stairs currently exist as spaces; give a few of them a reason (a boss, a vault, a vista).
5. **A long/short rhythm** — pair each big multi-stage arc with quick 1–2 step palate-cleansers so it never feels grindy.
6. **Biome-aware naming + a signature NPC cast** so each shore is a *place*, not a template.
7. **Build-reward ties** — quests that drop biome-flavoured décor/materials for your CIRQLSPACE (the already-planned economy).

This compendium is the baseline. The 12 new rings get planned against it next.
